

Tiltmeter with Bluetooth interface

This smart and advanced battery-operated Tiltmeter interface, will turn any standard Tiltmeter with two (4-20mA) wires or 0-5v output to “smart” stand alone device with Bluetooth communication. Free (Android) Apps allow reading the Tiltmeter from a distance of up to 30 meters (open field) and saving the readings to a history file in excel format. File then can be sent directly from the phone to any email or as a message.

Main features:

- ◆ We can provide the entire Tiltmeter or just the interface device
- ◆ Very high accuracy. Sealed to meet IP68
- ◆ No external power required and very low power consumption. Battery last for a few years
- ◆ Factory pre-calibrated according to the Tiltmeter range
- ◆ RS-485 serial communication (option)
- ◆ Very friendly Apps available free on play store. Apps displays also sensor's name, temperature and battery level.
